

Product: PCH190
Product Size: 150mm(dia)
Decoration Options: Print

1. If the design has sharp, continuous curves, there may be difficulty in displaying the image. This is due to the inflation of the ink on the balloon after printing.
2. In order to ensure a better print effect, please avoid using large area designs, as this will decrease the ability of the ink to dry instantly, and the design.
3. We suggest the distance between lines on the design to be at least 2mm.
4. After inflated, it is common for the colour to become lighter.

Print size:100mm(w) x 100mm(h)
